C1 Managed Internal Broadband Services (MIBS)

C1 Managed Services for K-12 School Districts

School districts are increasingly overwhelmed by the complexity and costs associated with managing their IT infrastructure, enterprise networking, and data centers. This is especially true as there is a significant growth in IT demand as schools are increasingly relying on digital learning tools, the demand for bandwidth, storage, and computing power. Their internal abilities to meet these demands is often difficult. Partnering with a managed service provider becomes a strategic solution.

Overview

C1 Managed Services provides a comprehensive and cost-effective IT solution for K-12 school districts, focusing on enterprise networking, data center management, and IT security. Our services align with Managed Internal Broadband Services (MIBS) under the E-Rate program, designed to enhance the technological capabilities of school districts while easing their IT burdens.

Reasons school districts choose managed services

Cost efficiency

Focus on core educational goals

Enhanced security and compliance

Benefits

Cost efficiency: Predictable subscription-based pricing allows for precise budgeting, transforming unpredictable capital expenses into manageable operational costs.

Enhanced security and compliance: Safeguard your district's data against ransomware, phishing, and other cyber threats while meeting compliance standards with robust security protocols.

Access to expertise: Benefit from highly skilled IT professionals without the high costs of in-house expertise, enhancing your district's technical capabilities.

Reduced IT staff burden: Allow internal staff to focus on educational goals rather than IT operations, as C1 handles system troubleshooting, maintenance, and data backups.

Improved uptime and reliability: Ensure minimal disruptions to teaching and administration with proactive system monitoring and regular maintenance.

Features

OnGuard platform
C1's award-winning observability and AIOps platform provides proactive monitoring, ensuring issues are identified and resolved before they cause disruptions.

24x7 monitoring and support
Access to a 24/7 service desk and proactive maintenance through multiple Customer Success Centers (CSCs) ensures continuous uptime and reliability.

Scalability and flexibility
Easily scale your IT resources to meet changing demands, such as peak school periods, without requiring complete system overhauls.

Advanced security measures
Protect sensitive data from emerging cyber threats with advanced security tools and continuous monitoring, ensuring compliance with industry standards.

Predictable costs
Simplify budget planning with subscription-based pricing, eliminating unexpected expenses for repairs and upgrades.

Value Proposition

C1 Managed services can offer scalable, cost-effective IT management, ensuring districts meet their technology needs without sacrificing security, performance, or compliance while freeing up resources to focus on their core educational mission.

By partnering with C1, school districts can optimize their IT infrastructure and networking capabilities, reduce risks, and enhance their ability to focus on delivering high-quality education while maintaining a secure, reliable, and scalable technology environment.
