C1 Total Security Network

Best-in-class physical security, powered by an industry leading network, expertly delivered and professionally managed

Many networks today are under-powered and poorly designed to support physical security products such as video security and electronic physical access control systems. As physical security products become mission critical infrastructure for organizations, the ability to effectively deploy and manage these systems are quickly becoming a requirement.

C1 Total Security Network

C1's Total Security Network offering is designed for organizations seeking a scalable, integrated, and efficient surveillance solution. Our solution leverages advanced technologies to seamlessly align physical security with IT infrastructure needs, enabling secure and resilient operations across various sectors.

Scalability: C1's Total Security Network offer ensures that your security infrastructure can seamlessly scale to meet changing demands. With its elastic network capabilities, the system automatically adjusts to infrastructure changes—be it additions, removals, or relocations—without disruption.

Fully integrated: Experience a truly cohesive security system. Our intelligently designed solution integrates all components of your surveillance network into a single, unified platform. This integration simplifies deployment and operation, providing a seamless experience across devices and locations. From private enterprises to public sector needs, our solution is tailored to fit any environment with ease.

Operational efficiency and ease of management: Streamline operations with proactive management and built-in automation. Our all-in-one solution reduces the complexity of managing surveillance systems, allowing for efficient resource allocation and minimizing downtime.

Features

Scalability
Scale Effortlessly: Support for thousands of video devices with increased deployment speed.

Elastic Network Capabilities: Automatically adjust to infrastructure changes without disruption, ensuring continuous protection.

Simplified deployment
Zero-Touch Provisioning: Automate camera deployment to streamline and accelerate the setup process.

Managed services
24x7x365 support: Proactive and predictive services powered by OnGuard, our award-winning monitoring platform.

Comprehensive lifecycle management: From advisory and professional services to ongoing administration.

Tight integration
Unified system: Verkada network cameras integrate seamlessly with Extreme Networks Fabric for robust and secure video stream management.

Secure multicast-enabled segments: Cameras automatically connect to secure network segments, enhancing data integrity.

High availability and resiliency
Extreme's Fabric provides network resilience, ensuring that essential security systems remain functional even during network disruptions.

Monitor from anywhere
Security teams can monitor the facility from any location, find, save, and share footage on-the-go. Plus, share live camera feeds with local authorities in seconds.

Industry use cases

Safer schools
- Integrated security: Protect students and staff with Verkada's hardware-software solution running on a highly secure, resilient Extreme network.
- Real-time monitoring: Lockdown capabilities & live camera feeds enable instant response to threats.
- Vaping and bullying detection: Utilize sensor technology for enhanced safety measures.

Healthcare
- Patient safety: Ensuring that patients are safe from physical harm within the healthcare environment is paramount. This includes controlling access to sensitive areas like operating rooms, intensive care units, and mental health facilities.
- Pharmaceutical security: Controlling access to medications, especially controlled substances, prevents theft and misuse, a growing concern in many healthcare institutions.
- Access control: Limiting access to certain areas to only authorized personnel help to prevent unauthorized entry to sensitive areas where patient care, research, or data storage occurs.

Financial vertical
- Secure facility access: Implement role-based access and door schedules to control secure areas.
- Visitor management: Conduct effective screenings with cloud-based systems, integrated with surveillance data.

Value proposition

C1 provides a seamlessly integrated surveillance solution that is intelligently designed, expertly delivered, and proactively managed. Our solution ensures scalability, simplifies deployment, and enhances operational efficiency, making it the ideal choice for private and public sector organizations.
