Virtual Learning & Support

Resource utilization across the district

LIVE INSTRUCTION | STUDENT SERVICES | INTEGRATED ROOMS

When teachers or specialists cannot reach every campus, students lose out on learning opportunities and timely support. C1 connects supervised classrooms and virtual support through lifelike audio and video on enterprise-grade devices and networks, letting educator specialists serve every corner of their district—even underserved or understaffed communities.

Connect students with qualified teachers in hard-to-staff subjects while providing greater access to mental and physical health.

Measured Outcomes

01 **More specialized courses within reach.** Make more subject matter and CTE classes accessible to every corner of the district.

02 **Fewer uncovered class periods.** Keep learning on track with supervised remote instruction when dynamic absences run long.

03 **Faster access to student support.** Provide increased number of student appointments for private counselling and health visits.

04 **More time spent with students.** Increase staff impact by creating more meaningful student-facing hours and less windshield time.

Priority Virtual Support Use Cases

Shared Teaching & Coverage	Virtual Student Services	Value Realization + C1 Services
• Live virtual instruction for remote teachers providing substitution • Keep differentiated courses open and active with shared specialists • Offer virtual field trips with higher ed partners or industry professionals	• Provide private rooms for counseling and school-linked health visits • Create quality collaboration environments as good as the real thing • Google Meet, Zoom, Teams, and Cisco integrations for external connections	• Discover eligible grant opportunities mapped to gaps before investing in tech • Design expert virtual learning rooms ensuring every student is seen and heard • Customer-run operations; optional tuning scoped separately
