C1 + Palo Alto Networks

C1 is a Diamond Level Palo Alto Networks Partner. Our mission is to lower our customers' concerns around cybersecurity and assist with the changing landscape while reducing risk within their businesses.

Diamond
Level Partner

Certified
Professional Services Partner (CPSP)

Through our partnership with Palo Alto Networks, we develop comprehensive cybersecurity solutions that protect our customers' critical assets and information.

INFRASTRUCTURE PROTECTION

C1's Infrastructure Protection Services help you proactively prevent, detect, and recover from attacks. With Palo Alto Networks' SASE and Zero-Trust solutions, we can eliminate the notion of trust to protect networks, applications, and data. Defenses must be joined-up, seamless, and always one step ahead.

SECURITY ADVISORY AND RISK MANAGEMENT

C1 helps organizations develop and execute strategies to reduce their cybersecurity, regulatory, and compliance risk exposure. Combining Palo Alto Networks' architected roadmaps, C1's focus is on the prevention, detection, and recovery from cyber threats.

CLOUD SECURTIY

As more organizations move to the cloud, security solutions must extend to protect hybrid and multi-cloud workloads and environments. With Palo Alto Networks' Prisma Cloud, we can help customers improve visibility and control, secure automation, and protect data, workloads, and applications. Additionally, Palo Alto Networks' new Prisma Access Browser provides secure, isolated access to web applications—helping organizations protect users and data against advanced browser-based threats, even in unmanaged environments.

PROFESSIONAL, MANAGED, AND ADVISORY SERVICES

At C1, we deliver comprehensive Advisory, Professional, and Managed Services to help you maximize the value of Palo Alto Networks' industry-leading solutions—Strata, Prisma, and Cortex. Our experts partner with your team to uncover obstacles, align technology with business outcomes, and strengthen your overall security posture. Whether deploying Strata firewalls with advanced subscription capabilities, securing multi-cloud environments with Prisma, or harnessing AI-powered threat detection with Cortex, C1 ensures seamless integration, operational efficiency, and continuous optimization—on-premises or in the cloud.
